

Claims

- [c1] 1. A combination mobile phone and digital camera comprising:
- a processor;
 - a processor readable storage medium;
 - code recorded in the processor readable storage medium to enable audible control of a camera;
 - code recorded in the processor readable storage medium to compare detected audible signals to a database of commands for purposes of recognizing a command; and
 - code recorded in the processor readable storage medium to execute a series of instructions associated with a command that has been recognized.
- [c2] 2. The combination mobile phone and digital camera of claim 1 wherein the series of instructions comprises:
- code recorded in the processor readable storage medium to take a picture.
- [c3] 3. The combination mobile phone and digital camera of claim 1 wherein the series of instructions comprises:
- code recorded in the processor readable storage medium to compose a message;
 - code recorded in the processor readable storage medium

to attach a picture to the message; and
code recorded in the processor readable storage medium
to send the message.

[c4] 4. The combination mobile phone and digital camera of
claim 3 wherein the code recorded in the processor
readable storage medium to compose a message com-
prises:
code recorded in the processor readable storage medium
to address the message to one or more recipients; and
code recorded in the processor readable storage medium
to insert text to the message.

[c5] 5. The combination mobile phone and digital camera of
claim 3 wherein the code recorded in the processor
readable storage medium to compose a message com-
prises:
code recorded in the processor readable storage medium
to address the message to one or more recipients; and
code recorded in the processor readable storage medium
to attach audio to the message.

[c6] 6. The combination mobile phone and digital camera of
claim 3 wherein the message is an e-mail message.

[c7] 7. The combination mobile phone and digital camera of
claim 3 wherein the message is an MMS message.

[c8] 8. The combination mobile phone and digital camera of claim 1 wherein the camera is integrated into the mobile phone.

[c9] 9. The combination mobile phone and digital camera of claim 1 wherein the camera is attachable to the mobile phone as an accessory.

[c10] 10. A combination mobile phone and digital camera comprising:
a microphone to detect audible input;
a database containing entries characterized as camera commands; and
a processor to:
process detected audible input;
compare detected audible input to the database of camera commands;
determine if the detected audible input matches one of the camera commands in the database; and
execute a series of instructions associated with a camera command that has matched a detected audible input.

[c11] 11. The combination mobile phone and digital camera of claim 10 wherein the series of instructions comprises taking a picture.

[c12] 12. The combination mobile phone and digital camera of

claim 10 wherein the series of instructions comprises:
composing a message; and
attaching a picture to the message.

[c13] 13. The combination mobile phone and digital camera of claim 12 wherein composing a message comprises:
addressing the message to one or more recipients; and
inserting text to the message.

[c14] 14. The combination mobile phone and digital camera of claim 12 wherein composing a message comprises:
addressing the message to one or more recipients; and
attaching audio to the message.

[c15] 15. The combination mobile phone and digital camera of claim 12 wherein the message is an e-mail message.

[c16] 16. The combination mobile phone and digital camera of claim 12 wherein the message is an MMS message.

[c17] 17. The combination mobile phone and digital camera of claim 10 wherein the camera is integrated into the mobile phone.

[c18] 18. The combination mobile phone and digital camera of claim 10 wherein the camera is attachable to the mobile phone as an accessory.
